Experience

MJV Technology & Innovation   📅 2025 – present
Specialist Technology Assessor   📍 *Remote*

- Developed end-to-end enterprise solutions for Bradesco using .NET, Java, Angular, focusing on high performance and scalability.
- Collaborate with stakeholders to design and implement technology strategies that align with business goals and innovation initiatives.
- Optimize application performance and resource usage, applying best practices in cloud environments, database design, and frontend responsiveness.

eCine Software Engineering   📅 2021 – 2025 (∼ **4 anos**)
📍 *Rio de Janeiro, Brasil*

Developer – Junior   *2021 – 2023*
Developer – Mid-level   *2023 – 2025*

- Acted as Tech Lead in multiple projects, guiding cross-functional teams in architecture, development, and delivery of enterprise applications.
- Designed and implemented solutions using .NET, Angular, ReactJS, and React Native, integrating modern frontend frameworks with robust backend services.
- Managed CI/CD pipelines and project lifecycle using Azure DevOps, ensuring code quality, automated testing, and timely releases.

Projects

Curator — *.NET, C#, Entity Framework Core, PostgreSQL, Docker*   **2025**

- Developed an open-source, self-hosted cloud storage platform leveraging Telegram's infrastructure for unlimited file hosting.
- Implemented a secure .NET 8 backend with PostgreSQL authentication, JWT authorization, and a complete REST API.
- Packaged the application with Docker for simplified deployment and scalability across environments.

wdrop — *C#, .NET, Cross-Platform, CLI, HTTP/P2P*   **2024**

- Created a lightweight and fast terminal tool for instant file or folder sharing over LAN or web.
- Added features such as HTTP download links, QR code generation, P2P transfer, and optional uploads to 0x0.st.
- Built with cross-platform compatibility, running seamlessly on Windows, macOS, and Linux.

Flux — *React, TypeScript, Tailwind CSS, Recharts, Lucide*   **2024**

- Developed a modern web application for personal finance management, tracking income, expenses, and recurring transactions.
- Implemented customizable categories, interactive charts, and light/dark themes for enhanced UX.
- Ensured responsive design and optimized performance using React, TypeScript, and Tailwind CSS.

Education

Software Engineering, U. Cidade de São Paulo   📅 2024 – present
Bachelor   📍 *Rio de Janeiro, Brazil*

Systems Analysis and Developments, Estácio de Sá   📅 2021 – 2023 (∼ **2 years**)
Completed 4/5 semesters towards a Technologist in Systems Analysis and Development   📍 *Rio de Janeiro, Brazil*

Skills

Languages: Native: Portuguese — **Advanced**: English — **Intermediate**: Spanish

Technologies: C#, Typescript, Python

Frameworks: .NET, Spring Boot, Angular, ReactJS, React Native
